support, IT management, programming, network administration, software engineering, systems analysis, systems integration, and testing.

Project Services Support

Project services require experts who have been there before. The 180i technology professionals call on years of technology and management experience to ensure your projects come in as expected, when expected, with no surprises. From assessment, design and build to administration and maintenance, 180i will help your business perform optimally.

Management & Strategy Expertise

180i can also provide the staff and resources to help you make the right management and strategy decisions. We deliver a comprehensive set of solutions that include consulting, project teams, planning and management services. Additionally, we offer ongoing managed services to ease operations.

Get the Competitive Advantage

Built on a foundation of excellence, results and service, 180i works toward your satisfaction at every phase of the project, providing your business with the competitive advantages it needs to succeed in today's economy.
